

Courier Benefits

HomeValet's SaaS solution connects online retailers and couriers with a temperature-controlled Smart Box outside of consumers' homes. The Smart Box and software facilitate contactless, unattended, 24/7 delivery of frozen and refrigerated items along with pantry goods and other purchases. Opens new channels in grocery, alcohol, and pharmaceutical home delivery.

COURIERS

Reduce Reattempts & Liability

Deliver on the first attempt. Every time. All deliveries are contact-less, made straight to the consumer's HomeValet-powered Smart Box just outside their home. And proof of delivery to the Smart Box virtually eliminates damage and theft.

COURIERS

Eliminate In-Person Signatures

No need for a live signature. Age and identity verification all managed right through the automated platform.

COURIERS

Flexible Scheduling

Deliver when it's right for your schedule, not when the consumer is home. Imagine the possibilities.

HomeValet Empowers Couriers.
Delivery Just Got A Whole Lot Smarter.
